

To work with the module

When you try to enter the command `python setup.py build /`
`python setup.py install` in cmd, you will get the error Unable
to find `vcvarsall.bat`:

```
C:\Users\eidzh\Desktop\gg>python setup.py build
C:\Users\eidzh\Desktop\gg\setup.py:1: DeprecationWarning: The distutils package is deprecated and slated for removal in
Python 3.12. Use setuptools or check PEP 632 for potential alternatives
  from distutils.core import setup, Extension
running build
running build_ext
building 'sortP' extension
error: Unable to find vcvarsall.bat
```

- To avoid it, you need to download [build tools](#).
- And in the pop-up window, check this box and start the installation process:

If you try again, everything will work:

```
Создание кода
Создание кода завершено
```

And the imported module will work:

C: > Users > eidzh > Desktop > gg > ex.py

```
1  # -*- coding: utf-8 -*-
2  import sys
3  sys.path.append('C:/Users/User/Desktop/XXX.com/')
4  import sortP
5  print(sortP.bubblesort([1,343,542,-56,0,23]))
6  print(sortP.insertionsort([1,343,542,-56,0,23]))
7  print(sortP.shellsort([1,343,542,-56,0,23]))
```

[Running] python -u "c:\Users\eidzh\Desktop\gg\ex.py"

[-56.0, 0.0, 1.0, 23.0, 343.0, 542.0]

[-56.0, 0.0, 1.0, 23.0, 343.0, 542.0]

[-56.0, 0.0, 1.0, 23.0, 343.0, 542.0]
